SUMMARY

I am currently studying to be an Actuary at Oregon State University. I plan to graduate with a double major in Mathematics with a focus in Actuarial Science and in Advanced Data Science. I enjoy the simplicity and the thinking processes that goes behind these two majors. I am currently trying to advance my computer language skills like in Python or SQL. I am also trying to advance my math skills and go through all the Calculus classes before taking more probability and actuarial science based classes.

EDUCATION
